NITHISH RAO PERUMENKI

+91 6380565233 | Portfolio | nithishrao774@gmail.com | linkedin.com/in/nithish-rao-p | github.com/Botz-Nithish

PROFILE SUMMARY

Final-year CSE student passionate about coding, product development, and solving real-world problems. Experienced in designing and building full-stack, cloud-based, and AI-driven applications. Seeking a role to contribute through hands-on engineering and practical innovation.

CORE COMPETENCIES

- **Languages:** Java (Core, OOPs, DSA), Python, C, C++
- **Frontend & Web Technologies:** HTML5, CSS3, JavaScript, React.js,Next.js, Bootstrap, Tailwind CSS, Redux
- **Backend & API Development:** Node.js, Nest.js,Express.js, FastAPI, Flask, REST API
- **Databases:** MySQL, SQL, PostgreSQL
- **Cloud & Infrastructure:** Microsoft Azure (VMs, Azure SQL), VM Provisioning
- **Tools & Methodologies:** Git, GitHub, VS Code, Jupyter Notebook, Axios, Chart.js, Agile, Scrum, Software Testing

EDUCATION

Rajalakshmi Engineering College ***November 2022 - May 2026***
B.E. in Computer Science and Engineering CGPA: **7.01 / 10**
Database Systems, Algorithmic Programming, Cloud Computing Applications, Web programming, Operating Systems, Computer Networking, Machine Learning

Chettinad Vidyashram Higher Secondary School ***March 2019 - May 2022***
Higher Secondary Education

WORK EXPERIENCE

Finsol Consultancy Pvt Ltd- Vizag ***December 2024 - January 2025***
Front-end Developer Intern
- Migrated an existing AngularJS application to React.js, enhancing performance and maintainability.
- Implemented Tailwind CSS for styling, Axios for backend API integration and React Redux for global state handlings.
- Collaborated with a team of four through daily scrum meetings and code reviews to ensure code quality.

Zingbizz Digital Solution - Chennai ***February 2026 - May 2026***
Full Stack Developer Intern
- Developed a multi-tenant SaaS platform for WhatsApp and Instagram automation, launching a visual workflow builder, analytics dashboard, and live bot preview system. Scaled the automation capacity to potentially handle 50+ clients using Next.js, Node.js, and Supabase.
- Engineered a comprehensive Warehouse Management System (WMS), implementing 38+ critical modules with a robust JWT Role-Based Access Control (RBAC) system across 8 distinct user roles. Built on NestJS, Prisma, and PostgreSQL.
- Built a self-hosted, high-performance image delivery pipeline supporting dynamic WebP/AVIF optimization and Nginx disk caching, successfully reducing frontend image load times by 5X .

ACADEMIC PROJECTS

V-Meet: Automated Virtual Machine Provisioning and Management System ***October 2025 - December 2025***
Tech*: Azure VMs, SQL, React.js, Node.js, Express.js, REST APIs, Google Gemini API*
- Engineered an automated Azure-based VM provisioning system for academic labs, enabling role-based access and one-click deployment for entire classes.
- Designed a full-stack web platform with separate Teacher, Student, and Admin portals to manage courses, VM requests, approvals, and real-time status tracking.
- Integrated AI-driven chat assistance and analytics using Google Gemini API to provide intelligent insights and improve usability.

Journalist Profile Viewer ***March 2025 - June 2025***
Tech*: React.js, Express.js, REST APIs, Chart.js*
- Developed an academic profile viewer that showcased research authors details including citations, co-authors, and scholarly metrics for quick reference and analysis.
- Integrated an AI-driven summarization module to generate concise and structured author profiles from extracted data.
- Used SerpAPI with an Express.js backend to fetch and process author and publication data from Google Scholar.

NeruoRythm: EEG Music Mapper for Autism Aid *(IEEE Publication)* ***October 2025 - December 2025***
Tech*: Python, JavaScript, React.js, FastAPI, Data visualisation*
- Developed an EEG-to-music mapping system that converts brainwave signals into therapeutic MIDI compositions for autism support.
- Implemented EEG signal processing and frequency band analysis (Delta–Gamma) using Python to map neural features to musical parameters such as pitch and tempo.
- Built a full-stack application with a FastAPI backend and React frontend enabling EEG upload, real-time processing, visualization, and music playback.

HONORS AND ACHIEVEMENTS

1st Place in Techno Kallos, *REC* ***November 2024***
- Secured 1st Place at *Techno Kallos – Design Summit* (Rajalakshmi Engineering College) for designing and developing a luxury e-commerce website and a complete UI redesign under competitive, time-bound conditions.
- Demonstrated strong frontend fundamentals by hand-crafting responsive layouts, UI components, and visual design from scratch, collaborating effectively in a two-round design challenge.

Claude Code in Action – Certification ***February 2026***
- Completed *Claude Code in Action*, developing strong knowledge in prompt engineering and AI-assisted development workflows.
